

TROVENT

Application Audit Confirmation

Trovent Security GmbH confirms the successful completion of a

Penetration Test

of **otris software AG's**

otris privacy

Scope

Trovent Security GmbH tested the **otris privacy** web application.

Methodology

The penetration test was performed using a combination of automated and manual testing methods. The **otris privacy** web application was checked for web application security weaknesses on the basis of methods described in the OWASP Web Security Testing Framework.

Period

Penetration Testing period: 2021-11-23 to 2021-12-01, retest on 2022-03-02 and 2022-04-22

Result

The final penetration retest of the **otris privacy** web application did not result in any security vulnerability findings with a risk rating of high or critical.

Signature

A handwritten signature in black ink, appearing to read 'Alexander Caswell', is written over a horizontal line.
